

C3 LMS

Key Features

Easy Creation of Courses and Curricula:

SCORM/AICC compliant allows installation of third party libraries and web-based content of C3 LMS will support performance goals, career plans, organization development, and compliance (FDA and company policies) objectives. C3 LMS registers and reminds employees of mandatory courses and also provides an insight about optional training courses available for optional self-enrollment.

Automated Rules, Notifications, and Reporting Made Easy:

C3 LMS lowers management personnel overhead by automating tasks and set up automated assigning rules to all users, individual departments, or individual employees based on their needs. Easily export reports to Excel or PDF or use API to integrate reporting with HRIS and other third party systems or applications. Audit-ready and real-time training distribution and reporting learning management system compliant with 21 CFR Part 11.

Compatible with Any File Type:

Upload PDF, PowerPoint, picture, audio, video, SCORM, and all other different file types. Integrate with internal content management system, as well as external content management system like Kaltura.

Single Sign On Method:

Single Sign On is a method that enables a user to log in once and gain access to resources without being prompted to login again with Active Directory integration.

Compliance Activities:

Document all the training activities in audit-ready format with easy report access to designated personnel and examination by FDA inspectors. Ensure role-based training assignments such as SOPs and other critical company policies by integrating with document management systems.

Automated SOP Training Management:

As SOPs are the backbone of consistent GMP compliance, C3 enables effective SOP training program by ensuring that all responsible employees and external parties automatically receive information needed to comply with GMPs and GDPs.

C3 LMS Learning Management System

Cignus offers C3 LMS Solution Package that is customizable to the needs of the corporate organization. The solution can be sliced and diced as per the focus and the level at which it benefits the target organization. This plug-in type model provides a generic learning framework, but also an organization specific learning framework.

Corporate

C3LMS facilitates the organizations to integrate new workers into the organization by a direct interface to HR Master Data. Digital library gives employees unlimited access to organization-specific knowledge and industry best practices. C3 is modular and scalable to help the organization start small and scale up rapidly as its needs evolve.

Compliance

C3LMS facilitates the organizations to achieve greater compliance training in a heavily regulated industry where patient's safety is a huge concern. C3 is a fully 21 CFR Part 11 compliant and validated LMS relied on by Pharmaceutical, Medical Device, and Biotech companies.

Cloud

C3LMS facilitates the organizations to centralize their training materials in a secure, web-based environment synced with HTML 5 which enables content organization and all-encompassing browser support feature giving users freedom to choose their learning device.
