Reduced risk and tested recovery mechanism with minimized disruption for business.

**CLOUD SOLUTION**

**CLOUD MIGRATION AND COMPLIANCE IT SERVICES FOR LIFE SCIENCES**

Cignus offers cloud migration and compliance services for the life sciences industries. Our expertise in developing sustainable cloud solutions makes it possible to migrate your infrastructure and systems quickly and economically.

Cignus cloud engineers approach each project individually and our process begins with research /analysis to determine the best cloud system for you whether it is hybrid, private, or shared—and to develop a complete migration plan.

We have developed proprietary tools to make plug-and-play migration and compliance possible. Once your systems are in the cloud, we manage your solution for continuous compliance and improvement.

The Cignus cloud migration roadmap establishes governance, so you can reduce your IT overhead and risk of data loss while Cignus ensures security and privacy of all your data and systems.

Cignus has established technology partnership with Amazon Web Services, the leading cloud space for life sciences. Our cloud migration road map illustrates the end-to-end process we employ for a fully compliant cloud implementation with AWS. Once installed, we manage your cloud solution for compliance and continuous improvement.
